

FOR IMMEDIATE RELEASE

LEARN THE NEW, IMPROVED INTERFACE OF UNIGRAPHICS NX5  
Design Visionaries Releases Basic and Intermediate NX5 Modeling, Drafting and Assemblies

San Jose, CA – November, 2007 – A new book by Design Visionaries teaches the basic modeling, assemblies and drafting functionality of Unigraphics NX5. Basic and Intermediate NX5 Modeling, Drafting and Assemblies by Stephen Samuel, Anuranjini Pragada and Eric Weeks, is a newly revised version of Design Visionaries' previous book Practical Unigraphics NX4 Modeling, Drafting and Assemblies.

Once again, the latest version of NX has gotten easier to use. The new NX5 menus are structured so that average users are not daunted by the complex choices, yet advanced users can select extremely convenient pull downs that allow access to the most powerful and intricate techniques.

Quickly get up-to-speed with the new NX5 (vastly improved) interface.

This book, a joint effort of the Design Visionaries team, compiles the tips and techniques developed over the years training the engineering community. Using their popular NX, NX2, NX3 and NX4 books as a starting point, the authors have greatly expanded the content, detail and exercises included in this edition. The methods outlined in this book go beyond an academic use of NX5. They are tricks of the trade that come from thousands of hours of actual use of the software to design some of the most difficult products in the world. The exercises provided in this book are classroom-tested and will surely help you learn NX5.

Make NX5 work for you!

About the Authors

From 1996 to present, Stephen Samuel has served as President of Design Visionaries Inc. With a BSME from the University of Massachusetts, Stephen began his career in 1983 at the prestigious Pratt and Whitney jet engine manufacturing firm. A Brooklyn, NY, native, Stephen enjoys his position at Design Visionaries where he maintains strategic alliances with major engineering firms located in the US, UK, Holland and Japan. Stephen is the author of four distinctive books on the subject of Unigraphics appreciated by customers throughout the world.

Anuranjini Pragada, Industrial Design Lead at DV, has extensive industrial design and product design experience with different 3D Modeling software, including Unigraphics, Pro/ENGINEER, SolidWorks, CDRS, AutoCAD, 3D Studio MAX and Mechanical Desktop. She has been a major contributor to a vast array of products from automotive to medical to consumer electronics. She specializes in creative uses of computer-aided design and modeling.

Eric Weeks, Senior Engineer, has over 10 years of mechanical design and product development engineering experience at DV, Johnson & Johnson, and Medtronic. He has developed products using Unigraphics and Pro/ENGINEER. He has trained engineers in UGNX CAD and Teamcenter Engineering PLM. Eric is co-author of Teamcenter Engineering PLM publications and co-inventor on pending U.S. Patents.

#### About Design Visionaries

Design Visionaries offers a unique blend of engineering-related products and engineering know-how. With over 100 years of combined experience, Design Visionaries is fortunate to have extremely talented, highly qualified, creative professionals available to supply an extraordinary array of design and engineering services. Design Visionaries' knowledge and experience span a large range of engineering disciplines and industries. The team has worked in the fields of aerospace, medical, automotive, industrial, and consumer products to mention a few. Let Design Visionaries help you accelerate your product development through process innovation, and global collaboration.
